NAHOM WOLDEMICHAEL

Software Engineer | AI Data Evaluator

+251941927360 • nahomg761@gmail.com • https://nahomwoldemichael.vercel.app/
• https://www.linkedin.com/in/nahomgwoldemichael/ • Addis Ababa, Ethiopia

Summary

Software Engineer specializing in web and mobile application development, with hands-on experience shipping cross-platform products, iOS applications, real-time trading systems, and scalable learning platforms. Strong in Flutter, React.js, Next.js, SwiftUI, Node.js, PostgreSQL, MongoDB, and WebSockets, with additional experience in AI data evaluation and blockchain development. Focused on clean architecture, performance, security, and software that delivers measurable results.

Key Achievements

- **WebSockets Optimization**
  Reduced trader data latency by 30% through real-time WebSocket implementation.
- **User Engagement Increase**
  Improved user engagement by 35% with interactive dashboards and assessment modules.
- **Traffic Boost Through SEO**
  Increased client traffic by 40% through technical SEO improvements.
- **Scalable LMS Development**
  Supported an LMS serving more than 2,000 active students.

Experience

Shield P2P — Addis Ababa, Ethiopia

iOS Engineer & AI Data Evaluator | Blockchain — 12/2025 - 09/2026

- Developed and maintained iOS applications with Swift and MVVM, emphasizing modular architecture, security, and comprehensive testing.
- Built blockchain applications with smart contracts and Web3 technologies, applying secure decentralized interaction patterns and validation.
- Evaluated AI-generated software responses for logic, security, correctness, and performance across technical domains.
- Produced code explanations and technical rationales in Google Colab and Markdown to support AI-assisted development and LLM fine-tuning workflows.
- Conducted peer reviews of software and blockchain code, providing actionable feedback against quality, performance, and security standards.
- Shipped a SwiftUI and Core Data iOS application to the App Store with a 4.8-star rating.

Rhobot Capitals — Addis Ababa, Ethiopia

Flutter Developer & LMS Co-Developer — 01/2025 - 12/2025

- Co-engineered an end-to-end Learning Management System supporting 2,000+ students, including backend schemas for secure video streaming and automated certificates.
- Built student dashboards and assessment modules that increased user engagement by 35% through progress tracking and interactive learning workflows.
- Architected and maintained the Rhobot Capitals Forex trading app for iOS and Android using Flutter and real-time data workflows.
- Implemented WebSocket connections that reduced trader data latency by 30% while improving state management, performance, and battery efficiency.
- Integrated interactive charting and secure payment gateways while maintaining strict application and data security practices.

Education

University of the People — Pasadena, CA (Remote)

B.Sc. in Computer Science — 06/2023 - 11/2025

- Data Structures, Algorithms, Software Engineering, Databases, Computer Systems.

Addis Ababa Science and Technology University (AASTU) — 04/2021 - 05/2025

B.Sc. in Chemical Engineering

ALX-Africa — 01/2022 - 01/2023

Software Engineering Program

Training / Courses

Complete Web-Dev Bootcamp	- Udemy / AppBrewery
Ethical Hacking - JavaScript Mastery	- Udemy

Skills

Languages	JavaScript • TypeScript • Dart • Python
Mobile	Swift • SwiftUI • Flutter • Core Data • App Store Deployment • Cross-Platform Development
Web	React.js • Next.js • Node.js (Express) • HTML5 • CSS3/Tailwind • RESTful APIs • JWT Authentication
Databases & Backend	PostgreSQL • MongoDB • Firebase • Firestore
DevOps & Tools	Git • GitHub • GitHub Actions • Postman • Figma • Vercel
Core Competencies	Data Structures & Algorithms • Object-Oriented Programming (OOP) • MVVM • Provider • Redux • Unit Testing • UI/UX Testing • Agile Development • Technical SEO
Emerging Technologies	WebSockets • Web3 • Smart Contracts • Blockchain Development • AI Data Evaluation • LLM Fine-Tuning Support

Projects

Smart Retail E-Commerce Platform 02/2025

React.js • Node.js • MongoDB

- Built a full-stack dashboard for inventory tracking, mock payments, and real-time sales visualization.
- Improved deployment efficiency by 35% by implementing JWT authentication and a GitHub Actions CI/CD pipeline.

Automated Task Management API 02/2026

Python • Django • PostgreSQL

- Developed a scalable RESTful API for complex CRUD operations with optimized queries, reducing average server response time to under 200ms.
- Improved system reliability by 15% through comprehensive endpoint testing with Postman.

Certifications

GitHub Actions for CI/CD	- Udemy
