Nahom Girma Woldemichael

SOFTWARE ENGINEER | FULL-STACK, AI & MOBILE PRODUCTS

+251 941 927 360 | nahomg761@gmail.com | linkedin.com/in/nahomgwoldemichael | github.com/kylosonic | nahomwoldemichael.vercel.app | Addis Ababa, Ethiopia | Open to remote

PROFESSIONAL SUMMARY

Software engineer and founder with 3+ years building mobile, web, and AI-enabled products. Built Nourish, an offline-first tracker with 722 source-backed Ethiopian food rows, and FreightPilot, a logistics SaaS spanning FastAPI, PostgreSQL, React, Next.js, and Electron. Founder of Stealth Overlay, an AI workflow consultancy for boutique agencies. Works end to end in TypeScript, Python, Dart, React, Next.js, NestJS, FastAPI, and Flutter.

CORE COMPETENCIES

Full-Stack Product Development | React and Next.js | Python and Node.js APIs | PostgreSQL Data Modeling | Flutter and React Native | AI Workflow Automation | Offline-First Applications | Human-in-the-Loop AI | Testing and CI/CD

WORK EXPERIENCE

Stealth Overlay 2026 - Present

Founder and AI Automation Engineer · Remote

- Built a Next.js 16 consultancy for marketing and creative agencies with fixed-price consultations, inquiry routing, interactive demonstrations, and a centralized offer model.
- Implemented typed validation with Zod, durable PostgreSQL and Vercel KV storage with local fallback, transactional email, protected admin views, and human approval checkpoints for customer-facing actions.

Nourish 2026 - Present

Founder and Full-Stack Product Engineer · Remote

- Built an offline-first Ethiopian nutrition product across Flutter, React Native, Expo, and a NestJS/Prisma/PostgreSQL API.
- Implemented deterministic nutrition calculations using 722 published food rows from the Ethiopian Food Composition Table 2025, with source provenance instead of AI-generated values.
- Developed photo and text meal analysis, gram-based portions, English and Amharic search, hydration reminders, account linking, and queued sync; validated with 246 Flutter, 93 API unit, and 83 API end-to-end tests.

FreightPilot 2026 - Present

Founder and Full-Stack Engineer · Remote

- Built a logistics SaaS with FastAPI, SQLAlchemy, Alembic, PostgreSQL, a React operations console, a Next.js product site, and an Electron desktop shell.
- Implemented inventory, orders, fleet records, CSV onboarding, forecasting, route optimization, shipment lifecycle, proof of delivery, and day-end cash close.
- Built company onboarding, authentication, role-based access, subscriptions, usage metering, encrypted bring-your-own-key AI settings, and CI release gates.

Shield P2P 02/2025 - 09/2026

iOS Engineer and AI Data Evaluator · Remote

- Developed and maintained iOS applications with Swift and MVVM, using XCTest coverage; shipped a SwiftUI and Core Data app to the App Store with a 4.8-star rating.
- Evaluated AI-generated software for correctness, security, and performance, then documented technical rationales in Google Colab and Markdown for supervised fine-tuning workflows.

Rhobot Capitals 2025 - Present

Flutter Developer and LMS Co-Developer · Remote

- Architected the iOS and Android Forex app in Flutter and Firebase with WebSocket market data, interactive charts, and secure payments; reduced trader data latency by 30%.
- Co-built a Learning Management System serving 2,000+ active students, with secure video, assessments, and automated certificates; dashboards and assessments increased engagement by 35%.

Chiraro Digital Solutions 06/2023 - 12/2024

Web Application Developer · Remote

- Built and maintained React client applications, refactored legacy code into components, and improved technical SEO and performance, increasing client traffic by up to 40%.

SELECTED PROJECTS

Smart Retail E-Commerce Platform Full-Stack

Built inventory tracking, mock payments, real-time sales visualization, JWT authentication, and a GitHub Actions deployment pipeline.
React.js, Node.js, MongoDB, JWT, GitHub Actions

LLM Swift Evaluation Suite AI Evaluation

Built a 500-prompt benchmark, evaluated model outputs with RLHF protocols, and documented rationales for supervised fine-tuning.
Swift, Python, XCTest, Google Colab

EDUCATION

B.Sc. in Computer Science University of the People — July 2023 - November 2025
Pasadena, CA (Remote)

B.Sc. in Chemical Engineering Addis Ababa Science and Technology University — 2021 - 2025

Software Engineering Program ALX-Africa and Holberton School — 2022 - 2023

CERTIFICATIONS

GitHub Actions for CI/CD Udemy

Complete Web Development Bootcamp Udemy and The App Brewery

SKILLS

Languages: TypeScript, JavaScript, Python, Dart, Swift, Java, SQL, HTML5, CSS3, C, C++

Frontend and Mobile: React, React Native, Next.js, Flutter, SwiftUI, Tailwind CSS, Figma

Backend and Data: NestJS, Express, FastAPI, Django, PostgreSQL, Prisma, SQLAlchemy, Alembic, MongoDB, Firebase, Redis

AI and Automation: OpenAI-compatible APIs, structured outputs, agentic workflows, retrieval, LLM evaluation, browser automation, human-in-the-loop review

Platforms and Tools: Docker, GitHub Actions, Vercel, Supabase, Electron, Playwright, Vitest, XCTest, Git
